AFTERSCHOOL ACCESS SNAPSHOT: Central Minnesota

Over 1 in 3 youth are not regularly engaged in afterschool at least 3x/week (39% of youth)

Over 4 in 10 youth are not connected to a caring adult (42% of youth)

WE KNOW AFTERSCHOOL MATTERS!

Youth who report regular participation in afterschool tend to score higher on these developmental skills indicators:

- COMMITMENT TO LEARNING
- POSITIVE IDENTITY
- SOCIAL COMPETENCE
- FAMILY/COMMUNITY SUPPORT
- TEACHER/SCHOOL SUPPORT
- SELF-REPORTED GRADES

These findings back up what the research shows:
afterschool inspires students’ learning and builds the skills they need to succeed in work and life.

WE NEED #AfterschoolSuccess FOR EVERY YOUTH AND EVERY COMMUNITY

This brief shares key findings about afterschool access for youth in Central Minnesota, using an analysis of the 2016 Minnesota Student Survey (MSS) data. It is part of a series of briefs highlighting the regional and statewide gaps in young people’s access to afterschool programs.

By Income
50% of low-income youth regularly participate in afterschool, compared to 65% of their higher-income peers.

By Race/Ethnicity
55% of youth of color regularly participate in afterschool, compared to 62% of their White peers. The greatest disparities exist for Somali and Hmong youth.

Central Minnesota made up 25,985 (15.4%) of the over 168,000 Minnesota youth surveyed.

#AfterschoolSuccess

1 Analysis conducted by Dr. Michael Rodriguez, UMN College of Education and Human Development. Over 168,000 youth in Grades 5, 8, 9, and 11 across Minnesota participated in the Minnesota Student Survey. *Low-income youth defined as youth at or below 185% of the federal poverty line (eligible for free and reduced price lunch).

2 For more on how these indicators were created, see Rodriguez, M. (2017) “Exploring Development Skills, Supports, & Challenges of Minnesota Youth”
